

PIÑAVIDA

Bespoke application creation and Legacy Modernization

KEY FACTS

- 30% REDUCTION IN ON-PREMISES SPACE DUE TO MIGRATION TO THE CLOUD
- 40% REDUCTION IN TURNAROUND TIME
- 3 MONTH DELIVERY FROM INFRASTRUCTURE RE-ARCHITECTURE TO FULLY TESTED SOLUTION
- FULLY INTEGRATED AND AUTOMATED CUSTOMER REPORTING FRAMEWORK

Challenge

Our client needed a scalable solution in order to expand its operation into the African territories and to reduce the cost of having on site and end of life data centers.

The existing legacy platform had been used since the business began and no longer supported the evolved business model, a number of inefficient offline processes across had developed, costing the business millions in time spent.

Solution

Pina Vida deployed a multi-disciplinary Pod to redesign and rearchitect the legacy platform from its infrastructure through to the functional redesign to incorporate features that better supported the business.

PV's dedicated scrum master, product owner, development and test team created and released a brand new system architecture, test framework and process flow using their subject matter expertise.

This change team then supported this release through to user acceptance and business as usual.

Let's build something great together

Lots of companies can develop software for you.

Few can truly deliver the results you actually want.

**Our Delivery-First approach means
your projects are guaranteed to succeed**

So, if you'd like an honest discussion about
a new or ongoing project that is 100% focussed
on quality delivery, we'd love to talk to you.
